

## Model #3 - Generation 2

- Two-piece inserts – D2 top-plate
- Increased number of springs
- Stronger springs
- Smoother spring rotation using dowel mount
- Lubrication grooves in saddle

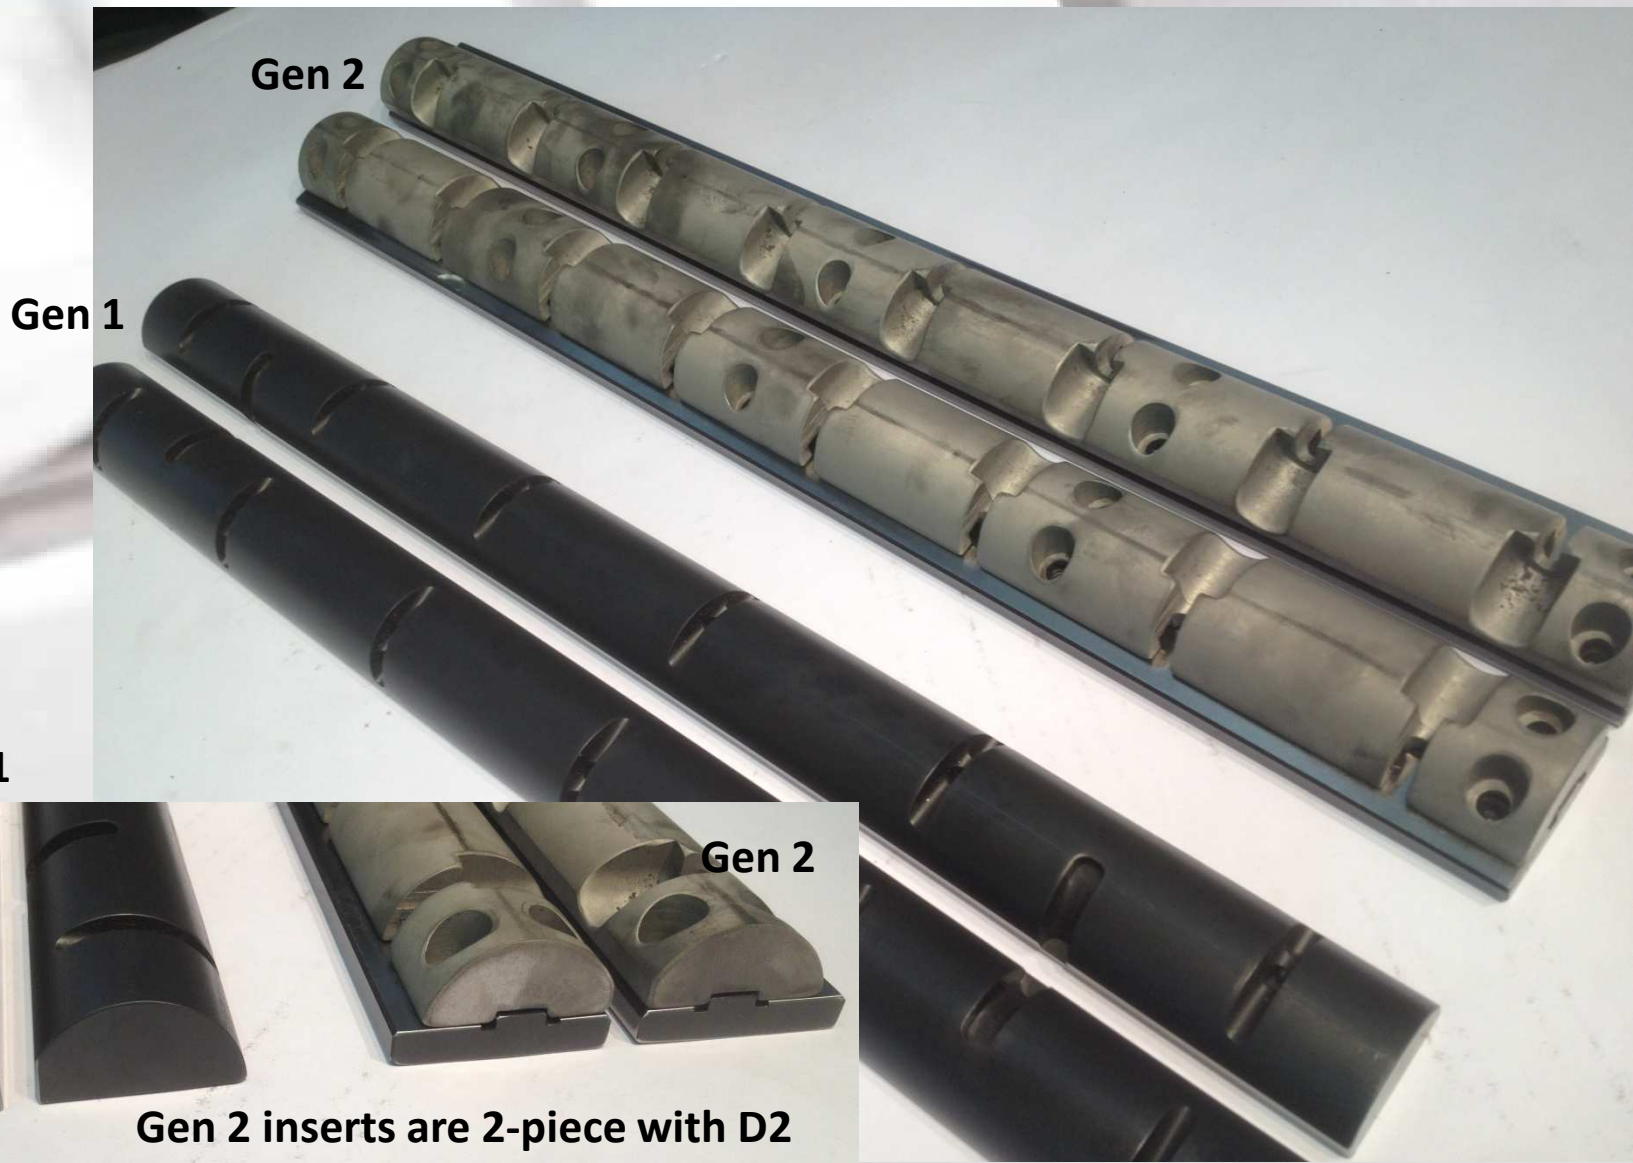

Insert retainer springs on Gen2 much stronger than Gen1 to ensure insert remains in contact with saddle during bending

Insert retainer springs increased from 12 springs per 500mm length to 16 springs per 500mm length

Lubrication 'grease-grooves' added on Gen2 for smoother operation

**Gen 2 inserts are 2-piece with D2 top plate for high durability**

**old-style model#3  
umbrella type  
compression spring  
12 springs per 500mm tool**

**new-style model#3  
tension type spring  
16 springs per 500mm  
tool length**
