

INTRODUCING...

THE WIRE SERVO FEEDS

WS500
model shown

The preferred choice for the most dependable, rock solid wire servo feed.

Take trust in the proven Rapid-Air quality you've relied on for more than a half century.

MEET OUR NEW, MECHANICALLY SUPERIOR WIRE SERVO FEED...

a tough unit that was manufactured with the highest quality materials and craftsmanship and is ready to deliver you the highest, most accurate production times. Choose from our WS250 with two feed rolls that maximize traction and minimize markings, or our WS500 which doubles up by featuring four feed rolls. The WS250 handles a maximum wire diameter of .250" with a minimum of .020", while the WS500 model offers from a .080" wire diameter up to .500" diameter. Both of these robust models have a minimum feed length of .001" up to the maximum feed length of 999.999". Paired with our 1/2" round stock cutter on our machine base makes for a complete round stock cut-to-length solution.

Rapid Air takes pride in offering you a comprehensive range of reliable air feeds, servos, straighteners, cut-to-length machines and reels, and is completely committed to you and your success.
